

TROPICAL WATERLILY FLOWERS ARE SPECIAL!

HERE ARE SOME TIPS TO HELP YOU ENJOY
THEM AT THEIR BEST.

Waterlilies should be kept in water at ALL times.

Use long-stemmed vases or cut the stems to fit the height of the vase using a sharp knife.

To prevent this, keep as much as possible of each stem under water.

Like Tulips, waterlily stems can bend overnight if too much of their length is left above water.

Waterlilies need lots of light. Flowers open in the morning in response to light and close at dusk. If they struggle to open in the morning, place them in a brighter spot, preferably with direct sunlight.
